Department of Conservation and Natural Resources 901 S. Stewart Street, Suite 5002, Carson City, Nevada 89701-5245 voice: (775) 684-2900 | fax: (775) 684-2909 | web: heritage.nv.gov

Plant and Animal Watch List July 2022

The Nevada Division of Natural Heritage (NDNH) systematically curates information on Nevada's endangered, threatened, sensitive, rare, and at-risk plants and animals providing the most comprehensive source of information on Nevada's imperiled biodiversity.

Nevada's health and economic well-being depend upon its biodiversity and wise land stewardship. This challenge increases as population and land-use pressures continue to grow. Nevada is among the top 10 states for both the diversity and the vulnerability of its living heritage. With early planning and responsible development, economic growth and our biological resources can coexist. NDNH is a central source for information critical to achieving this balance.

Management priorities for the state's imperiled biodiversity are continually assessed, providing opportunities to prevent population losses or elevations to endangered or threatened legal status through conservation actions.

A multi-disciplinary team of scientists and data management specialists assimilates information from diverse sources including field surveys, museum collections, resource management agencies, published and unpublished reports, online data portals, and knowledgeable individuals. This comprehensive inventory is maintained in a sophisticated database of spatial and tabular data, and is continually updated, refined, and subjected to quality controls.

The attached Plant and Animal Watch List outlines taxa that could be declining in Nevada or across much of their range and/or are less common than currently thought and, as a result, could become at risk in the future. This list also contains taxa that were recently removed from the At-Risk Plant and Animal Tracking List because they proved more abundant or widespread, or less vulnerable, than previously

thought. Lastly, this list contains species that are included solely because they are Bureau of Land Management (BLM) or U.S. Forest Service (USFS) management priorities, but do not meet NDNH's conservation priority criteria. These are typically taxa that are managed by BLM or USFS at different taxonomic levels (species vs. subspecies) than NDNH. Watch List taxa are not actively inventoried by NDNH; however, data are passively accumulated.

Taxa on the Plant and Animal Watch List are organized by taxonomic group, and presented alphabetically by scientific name within each group. Currently, there are 199 Watch List taxa: 94 plants, 27 invertebrates, 7 fishes, 2 amphibians, 15 reptiles, 26 birds, and 28 mammals.

Documentation of population status, locations, or other updates or corrections for any of the taxa on this list are always welcome. Literature citations with taxonomic revisions and descriptions of new taxa are also appreciated. The Nevada Native Species Site Survey Report form is available on our website under the Submit Data tab and is the preferred format for submitting information to NDNH.

This list is created and published periodically as a quick and easy reference; however, the most up-to-date species information, including the ability to create custom checklists, can be found on our website at http://heritage.nv.gov/species/. Other lists on the website include the At-Risk Plant and Animal Tracking List, Nevada Losses List, Nevada Endemic List and more (http://heritage.nv.gov/species/lists.php).

Key to Codes Used by the Nevada Division of Natural Heritage

Note: The Nevada Division of Natural Heritage makes every effort to keep other agency statuses current; however we recommend you consult the agency to ensure you have the most current information.

110.00.100.110	(Natural Heritage) Conservation Status Rank Definitions (i.e., G and S Rank)
Rank	Definition – see http://www.natureserve.org/explorer/ranking.htm for more detailed information.
Abbreviation	
G	Refers to the global population of a species.
S	Refers to the subnational (state) population of a species, subspecies, or variety.
T	Refers to the subspecific or variety taxonomic level (used in conjunction with Grank); uses numeric
	ranks 1-5 in the same way that G and S ranks are applied.
Х	Presumed Extinct or extirpated (Srank) – Not located despite intensive searches and virtually no
	likelihood of rediscovery.
Н	Possibly Extinct – Known from only historical occurrences but still some hope of rediscovery.
1	Critically Imperiled – At very high risk of extirpation in the jurisdiction due to very restricted range,
	very few populations or occurrences, very steep declines, severe threats, or other factors.
2	Imperiled – At high risk of extirpation in the jurisdiction due to restricted range, few populations or
	occurrences, steep declines, severe threats, or other factors.
3	Vulnerable – At moderate risk of extirpation in the jurisdiction due to a fairly restricted range,
	relatively few populations or occurrences, recent and widespread declines, threats, or other
	factors.
4	Apparently Secure – At fairly low risk of extirpation in the jurisdiction due to an extensive range
	and/or many populations or occurrences, but with possible cause for some concern as a result of
	local recent declines, threats, or other factors.
5	Secure – At very low or no risk of extirpation in the jurisdiction due to a very extensive range,
	abundant populations or occurrences, with little to no concern from declines or threats.
S#S#	Range Rank – A numeric range rank (e.g., S2S3 or S1S3) is used to indicate uncertainty about the
	exact status of a taxon. Ranges cannot skip more than two ranks (e.g., SU is used rather than S1S4).
	A range rank could also be applied at the global scale as well (e.g., G2G3).
NR	Taxon Not Ranked – rank not yet assessed.
NA	Conservation status rank is Not Applicable because element is not a suitable target for
	conservation activities (often used for non-native species or hybrids).
U	Unrankable – Currently unrankable due to lack of information or due to substantially conflicting
	information about status or trends.
Q	Questionable taxonomy – taxonomic distinctiveness of the entity at the current level is
	questionable or currently being reviewed; resolution of this uncertainty may result in change from
	a species to a subspecies, variety or hybrid, or the inclusion of this taxon in another taxon, with the
	resulting taxon having a lower-priority conservation status.
В	Breeding – Conservation status refers to the breeding population of the element in the nation or
	state/province.
N	Non-breeding – Conservation status refers to the non-breeding population of the element in the
	nation or state/province (e.g., wintering bird populations).
М	Migrant – Migrant species occurring regularly on migration at particular staging areas or
	concentration spots where the species might warrant conservation attention. Conservation status
	refers to the aggregating transient population of the species in the nation or state/province.
	Wildlife Service (USFWS) Endangered Species Act Listing
NDNH	Status Under the U.S. Endangered Species Act (ESA)
Abbreviation	
LE	Listed Endangered – in danger of extinction in all or a significant portion of its range.
LT	Listed Threatened – likely to be classified as Endangered in the foreseeable future if threats
LI	
	continue.
PE or PT	continue. Proposed as Endangered or Threatened Candidate for listing as Threatened or Endangered

SC	Species of Concern (former Category 1 Candidate or proposed species)
PDL	Proposed for delisting
SAE or SAT	Listed Endangered or Threatened because of similarity of appearance
PSAE or PSAT	Proposed Endangered or Threatened because of similarity of appearance
XE	Essential experimental population
XN	Non-essential experimental population
U.S. Bureau	of Land Management (BLM) Status
NDNH	BLM Status
Abbreviation	
S	Sensitive Species – Species designated Sensitive by State Director of Nevada BLM.
С	California BLM state status (sensitive)
U.S. Forest So	ervice (FS) Status
NDNH	FS Status
Abbreviation	
Е	Endangered – as designated by the Endangered Species Act
Т	Threatened – as designated by the Endangered Species Act
R4S	Region 4 (Humboldt-Toiyabe National Forest) Sensitive
R5S	Region 5 (Inyo National Forest or Lake Tahoe Basin Management Unit) Sensitive or Watch status
R5SP	Region 5 (Inyo National Forest [includes Lake Tahoe Basin Management Unit]) proposed Sensitive
	or Watch status
State of Neva	ada Protection and Designations (NAC 503)
NDNH	State Designation
Abbreviation	
EM	Nevada State Emblem
CE	Critically Endangered Plant
CE#	Recommended for listing as Critically Endangered Plant
CY	Protected as a cactus, yucca, or Christmas tree
GF	Game Fish (NAC 503.060)
PF	Protected Fish (NAC 503.065.1)
SF	Sensitive Fish (NAC 503.067)
TF	Threatened Fish (NAC 503.065.3)
EF	Endangered Fish (NAC 503.065.2)
PA	Protected Amphibian (NAC 503.075.2)
PR	Protected Reptile (NAC 503.080.1)
TR	Threatened Reptile (NAC 503.080.2)
UB	Unprotected Birds (NAC 503.055)
GB	Game Bird (NAC 503.045)
PB	Protected Birds (NAC 503.050.1)
SB	Sensitive Birds (NAC 503.050.3)
EB	Endangered Birds (NAC 503.050.2)
UM	Unprotected Mammal (NAC 503.035)
GM	Game Mammal (NAC 503.020)
FM	Fur-bearing Mammal (NAC 503025)
PM	Protected Mammal (NAC 503.030.1)
SM	Sensitive Mammal (NAC 503.030.3)
TM	Threatened Mammal (NAC 503.030.2)
Endemic to N	levada Status
Abbreviation	Definition
Υ	Found naturally only in the State of Nevada
Р	Probable endemic of Nevada

Climate Chan	ge Vulnerability Index (CCVI)
NDNH	CCVI score as assessed by the Nevada Division of Natural Heritage for taxon within the state of
Abbreviation	Nevada
EV	Extremely Vulnerable: Abundance and/or range extent within Nevada extremely likely to
	substantially decrease or disappear by 2050.
HV	Highly Vulnerable – Abundance and/or range extent within Nevada likely to decrease significantly
	by 2050.
MV	Moderately Vulnerable- Abundance and/or range extent with Nevada assessed likely to decrease
	by 2050.
PS	Presumed Stable – Available evidence does not suggest that abundance and/or range extent
	within Nevada will change.
IL	Increase Likely – Available evidence suggests that abundance and/or range extent within Nevada
	is likely to increase by 2050.
IE	Insufficient Evidence – Available information about a species' vulnerability is inadequate to
	calculate an Index score.
